Cambridge College is proud to present the work of artist **Theresa Monaco** as this month's entry in our 2018 Arts and Culture Series. This retrospective exhibition celebrates this late artist's talent for creating memory through portraiture. Describing her own work, Monaco stated, "Using light and dark as expressive qualities, the subject I have explored over the years is the human portrait, and more recently, interior spaces and landscapes. I have always been excited by a subject evolving and changing over time."
